

PROJECT MANAGER – CIVIL ENGINEERING CARY, NORTH CAROLINA

McGill Associates is a consulting engineering firm offering multidisciplinary services in North Carolina, Tennessee, and Virginia. We serve municipal and private clients with a focus on water/wastewater, civil site design, and environmental services. We are currently seeking highly motivated candidates for a Project Manager with experience in Water/Wastewater in our Cary, North Carolina office.

Essential Duties and Responsibilities

Typical project responsibilities will include developing project scope, budget, and fee for services; contract negotiations; staff management and scheduling; and client communication. The position requires the application of engineering design techniques and principles on a variety of both public and private water and wastewater projects. Responsibilities include business development, leadership of projects, and project management. Candidates should have experience working with clients and ensuring client satisfaction at the highest levels. Candidates will work closely with the senior project manager and marketing staff in the development and delivery of proposals and presentations. The Project Manager (PM) is responsible for developing project scope, fees for services, negotiation of contracts for agreements of engineering services, project budgeting, project scheduling and client communication. The PM plans, coordinates and directs design activities to ensure goals and objectives of all projects are accomplished within the prescribed scheduling, budget and funding parameters. He or she may be involved directly in design of projects including signing and sealing documents as the responsible engineer in charge. He or she works across disciplines to secure surveying, electrical engineering assistance and necessary design assistance from other design groups within McGill Associates. He or she may also coordinate required

assistance from outside consultants. The PM ensures that required internal quality control is applied to each project from conceptual planning through final design. The Project Manager interfaces with clients on a regular basis to ensure the highest level of client satisfaction and to help identify and develop future business opportunities. The PM may assist in the development and delivery of proposals and presentations.

Minimum Education and Licenses

- Bachelor of Science Degree in Civil or Environmental Engineering and a minimum of 7 years of experience in engineering with at least 2 years of progressive experience in the management of engineering projects and/or personnel
- North Carolina PE licensure or the ability to obtain one within 6 months of hire
- Valid North Carolina driver's license

Physical Demands

- Frequently required to sit, talk, and hear
- Occasionally required to stand and walk
- Reach with hands and arms
- Use hands to finger, handle, or feel objects, tools, or controls
- Frequently lift and/or move 35 pounds
- Occasionally lift and/or move up to 50 pounds
